

Health in All Politics - a better future for Europe

EHFG 2017: 20 Year Anniversary Edition

While efforts to foster inter-sectoral cooperation on health have been successful at times, real challenges remain. The discussions at the 20th European Health Forum Gastein will aim to dig deeper, taking the technocratic concept of Health in All Policies to the political level of policy implementation – Health in All Politics. Against a background of increasing populism and a post-truth era across Europe and beyond, the challenge to the EHFG on its twentieth anniversary is to build bridges between the different policy areas, guided by the European values of universality, access to good quality care, equity and solidarity.

The keywords below point to some of the thematic areas we feel will align well with our conference main theme and would especially welcome in the programme. We strongly encourage you to include them in your session proposal. They are designed as “food for thought” and are not to be understood as a comprehensive list of topics acceptable for the conference – we are open to suggestions!
