Beyer, Wendla-Antonia
Four Paws

Wendla Beyer leads the FOUR PAWS work on the effects of intensive farming on zoonotic disease risks, with a focus on highly pathogenic avian influenza and antimicrobial resistance. As a campaigns coordinator, she advocates for holistic policies to save antibiotic efficacy through improvements in animal welfare standards in commercial farms and food system transformation in line with a One Health approach.

Being a professional in international civil society organisations since 2013, Wendla focuses on public policy development and advocacy campaigns.

Academically, she has a Master's degree in European Studies, awarded with distinction, and a BA in Political Science from the University of Vienna, where she was a University Assistant for the Department of Political Science.
