Boeckx, Thomas
Flanders Agency for Care and Health

After 17 years of working as a GP and providing individual care to many patients, my focus shifted from the individual to realising social added value.

Since 2018, I have been working in Flanders as part of the primary care team to reorganise primary care in order to achieve more health and better care for all citizens. As team leader of a young and dynamic team, my guiding principles are transparency, cooperation with the various actors, flexibility and result-oriented work with extra attention for the most vulnerable.
