

Boschi, Nadia

Head of Sustainability Italy & Continental Europe Lendlease. Trustee of the International Society of Indoor Air and Climate (ISIAQ). Ambassador of the World GBC's Buildinglife campaign. Dr. Boschi served ISIAQ as its Secretary (2000-2003) and its President (2003-2006). Dr. Boschi holds a graduate degree in Architecture and a PhD in Architectural Technology and Environment from the Polytechnic of Milan (Italy). After an initial 10-year career at Virginia Polytechnic Institute & State University (US) as Professor of Building Construction she accepted a position with Lendlease. In these past 15 years she held a few international positions and became a recognized strong sustainability strategist and a leader in market positioning of large-scale urban developments. She has a proven ability to build high performing teams across cultures leveraging a unique combination of world-class technical and commercial acumen. Her passion for sustainable development – both social and environmental – translates in ability to create value for the business as well as for the impacted communities in environment and health and wellbeing terms. She leads the sustainability function in creating sustainable science-based solutions in addition to achieving third party certifications such as LEED, WELL and GRESB for Italy based funds/assets; and developing dossier for green finance compliant with the EU Taxonomy. Her recent sustainability strategies include the one for the Milan Innovation District (MIND) recognized by EU President as being one of the most innovative European developments.
