

Bosman, Arnold

Transmissible

Arnold Bosman is the founder of Transmissible (<https://Transmissible.EU>) - a Public Health Consultancy that provides expertise in health project design and evaluation, capacity assessments, intervention epidemiology projects and postgraduate professional development. In addition, he is manager of educational video productions for public health and facilitator of evaluations of health emergencies ('post mortems').

Arnold is a medical doctor – epidemiologist, and consultant in public health. Until 2016 he headed the Public Health Training Section at the European Centre for Disease Prevention & Control (ECDC). During the 10 years at ECDC he was leading the development of a new training programme in Public Health Microbiology 'EUPHEM', created an online community platform 'FemWiki', and initiated the ECDC Virtual Academy 'EVA'. Prior to that, he was chief scientific coordinator for the European Programme for Intervention Epidemiology Training 'EPIET'. He has worked as senior consultant in outbreak response and project leader in surveillance at the National Institute for Public Health and the Environment 'RIVM' in the Netherlands. At the start of his public health career he was project leader of public health informatics projects in infectious disease surveillance and has worked for several years as a local communicable disease control consultant.
