del Mar Mañú Pereira, Maria
Vall d'Hebron Research Institute Barcelona

Dr María del Mar Mañú Pereira leads the Rare Anaemia Disorders group at Vall d'Hebron Research Institute, with 20 years of experience in translational research in rare haematological diseases. Her work applies statistical modelling and AI to clinical and real-world data for biomarker discovery and personalised medicine. Scientific Coordinator of ERN-EuroBloodNet since 2017, she coordinates the European registries ENROL and RADeep and is a member of the ERDERA Steering Committee. She chairs the ERN Coordinators Group and leads Working Group 6 of the Health Leadership Mission for Rare Diseases on real-world evidence, AI-readiness and the European Health Data Space.
