Feleszko, Wojciech
Medical University of Warsaw

Prof. Wojciech Feleszko is a pediatrician, clinical immunologist, and pediatric pulmonologist at the Medical University of Warsaw, Poland. His research focuses on respiratory immunology and infection-driven immune modulation in early life. He has authored over 190 scientific publications, many addressing the intersection of recurrent respiratory tract infections, antibiotic stewardship, and the prevention of antimicrobial resistance (AMR) through immunomodulatory strategies.

As a member of the European Academy of Allergy and Clinical Immunology (EAACI), Prof. Feleszko has co-led clinical guidelines and task force initiatives on environmentally driven allergic diseases and infection prevention. He is also an active science communicator with a strong online presence, working to translate evidence-based medicine into accessible knowledge for clinicians and caregivers. Prof. Feleszko has been named among Poland’s 100 most influential physicians and regularly contributes to national public health debates.
