GASTEIN

Jensen, Genon
Health and Environment Alliance

Ms. Jensen is the founder and Executive Director of HEAL, which she launched over 20 years ago to integrate health protection into EU environmental policy after recognizing the links between pollution and diseases like cancer, asthma, and respiratory illness. Since 2000 she has represented the health sector on the WHO's European Environment and Health fora, and she was instrumental in founding the EDC-Free Europe campaign and co-founding the Global Climate and Health Alliance. She remains a passionate advocate for stronger environment and climate policies as a decisive path to better health and wellbeing for all.
