

Guardian, Marcus

European Network for Health Technology Assessment

Currently holds the positions as Chief Operating Officer, European Network for Health Technology Assessment (EUnetHTA 21); General Manager, International Horizon Scanning Initiative (IHSI) and as General Manager of the Heads of HTA Agencies Group (HAG). He further is Co-Chair of the European Task Force for Digital Medical Devices and the representative for the Netherlands in the EU HTA Coordination Group.

Based on the educational background in international law and diplomatic studies, Marcus has forged a career in network development, strategic guidance, and policy management. In 2016, he accepted the Chief Operating Officer position at EUnetHTA Joint Action 3 and now continues with EUnetHTA 21 Consortium. He also leads work of the Heads of HTA Agencies Group and supports the Chairs in processes of the strategic decision making, preparing European HTA landscape for the EU HTA Regulation. Moreover, in 2018 Marcus launched the International Horizon Scanning Initiative, building a global database of pharmaceutical products in development combined with novel data-modelling tools that support member state healthcare product negotiation potential.
