

Gunz, Daniela

Healthbank

Daniela holds a PhD in biochemistry from the ETH in Zurich. She has 15 years of experience in clinical research and drug development. As Clinical Research Director at MSD in Switzerland she was responsible for Phase I to IV trials in various disease areas. Through her assignment as president of the Clinical Research Working group of ScienceIndustries she broadened her network in the Swiss clinical research environment, partnered with government, academia and industry and helped to shape the clinical research field. She is now working in digital health and holds to position of Director of Research Partnerships at healthbank, the global people-owned health data transaction platform. Additional assignments include co-lead of Women in Digital Health Switzerland, board membership of SwAPP and advisory board membership of EUPATI Switzerland.
