

**Hendolin, Minna**

The Finnish Innovation Fund Sitra

Minna Hendolin is Leading Specialist in Sitra's Health Data 2030 project. A multitalented operator in the field of innovation, Minna's key task is to promote co-operation between the EU member states in the use of health data as part of the Joint Action Towards European Health Data Space, co-ordinated by Sitra. In addition to the European arena, you will find Minna active in the Finnish health sector's ecosystem work and forums.

During the past two decades, Minna has exercised influence in the health ecosystem in various roles in the academic world, business life and the public sector. Before joining Sitra, Minna worked for more than 10 years in leading positions at Tekes/Business Finland, which provided her with a great deal of knowledge about financing and turned her into an international health-sector influencer. Minna is an active influencer in international networks including the World Economic Forum Expert Group and the HIMSS Future50 community that identifies, celebrates, and connects top digital health leaders who make significant contributions to digital health globally.
