Jackson, Debra
London School of Hygiene & Tropical Medicine

Debra Jackson is the inaugural Takeda Chair in Global Child Health and Deputy Director of the MARCH Centre at LSHTM. Previously she held the position of Senior Health Advisor and Chief of the Implementation Research and Delivery Science Unit, Health Section, UNICEF, which focused on maternal, newborn, child and adolescent health programme research, data and digital health. She also holds an appointment as Extraordinary Professor at the School of Public Health (SoPH), University of the Western Cape (UWC), South Africa. She lived in South Africa from 2000-2013 and has experience working across Africa, Asia, Pacific Islands and the USA. At the SoPH she served as principal investigator for a range of research projects, including the multi-country PROMISE-EBF trial on promoting exclusive breastfeeding and the National South African Prevention of Mother to Child Transmission of HIV Evaluation. She has qualifications in nursing, public health, epidemiology and biostatistics. Her research interests are maternal and child health, infant nutrition, birth registration, health systems, community health workers, imbedded implementation research, MCH data and digital health. She has over 145 peer-reviewed publications and serves on several global and WHO advisory committees. Her current research includes being deputy coordinator for the HIGH Horizons project funded by the EU and UKRI focusing on climate, heat and the health of mothers and children.
