Kazmierczak, Aleksandra
European Environment Agency

Dr. Aleksandra Kazmierczak is an expert in climate change and human health at the European Environment Agency (EEA). She coordinates the European Climate and Health Observatory - a partnership between the European Commission, the European Environment Agency (EEA), and several other organisations. Aleksandra is also working on environmental health inequalities in relation to access to green space, exposure to climate change hazards, and social justice in adaptation responses. She has a long experience in urban and social aspects of adaptation to climate change. Before joining EEA in 2017, Aleksandra carried out research in the fields of human geography and spatial planning at University of Manchester and Cardiff University, UK, focusing on assessing social vulnerability to climate change and the role of green infrastructure for human health and well-being.
