

Kort, Alexander

Themis Bioscience GmbH

Alexander Kort is SVP Corporate Development at Themis Bioscience GmbH in Vienna, Austria. His responsibilities include all business development and licensing activities of Themis and oversight of all corporate development activities. Alexander has more than 10 years' experience in the vaccine industry from vaccine development to vaccine manufacturing. His recent achievements include the execution of a USD 200M research collaboration and license agreement with a global US based vaccine manufacturer on development of novel vaccine candidates and closing two partnership agreements with a global NGO for vaccine development against unmet infectious diseases. Prior to Themis, Alexander held various positions with increasing responsibility in project management, process development and manufacturing as well as strategic operations at IDT Biologika GmbH, a global vaccines and biologics CDMO with headquarters in Dessau-Rosslau, Germany. Alexander graduated in Biosystems Engineering with a focus on Systems Biology and holds an IPMA certificate for Project Management. As an expert from the vaccine industry with strengths in strategy, business processes and operations he is a well-received speaker and panellist at various conferences worldwide.
