

Larsson, Stefan

International Consortium of Health Outcomes Measurement

Dr Stefan Larsson, MD, PhD, trained at the Karolinska Institute (KI), Harvard Medical School and MRC Human Genomics unit in Edinburgh. He is an Associate Professor at KI. His PhD research was in pediatric nephrology and cell physiology and his postdoctoral work in molecular biology focused on the role of the Wilm's Tumor 1 gene. He has over 25 publications in peer-reviewed journals.

He joined the Stockholm office of The Boston Consulting Group (BCG) in 1996 and worked with the firm for 25 years. He was the founder and first leader of BCG's Payer and Provider sector (2011-17) and its Global Health Systems sector (2017-20). He is since 2011 a BCG Fellow responsible for Value based health care. After retiring from BCG in 2021 he is a Senior Advisor to the firm.

Stefan is a cofounder and the board chair of ICHOM, International Consortium of Health Outcomes Measurement, a not-for-profit co-founded with Prof Michael Porter of HBS and Martin Ingvar of the KI. Together with 1200 leading experts and patients from over 60 nations, the organization has developed global standards for measurement of outcomes that matter to patients covering 60% of the global burden of disease.

Stefan's 2013 TED talk in Singapore describes the importance of measurement and transparency of patient outcomes. He is a Distinguished Fellow with the World Economic Forum's Health and Healthcare group. In Nov 2022 McGraw Hill published his book "The Patient Priority" with coauthors Jennifer Clawson and Joshua Keller

Stefan lives in Stockholm, Sweden. Is married and has two adult children.
