Leisch, Franz
ELGA GmbH, Austria

Franz Leisch is manager of ELGA GmbH responsible for the implementation of Austria's national e-health record system. ELGA is a joint national initiative by all public payers in Austrian healthcare system, namely the federal government, the social insurances and the local governments. He is medical doctor and software engineer by training. Before ELGA GmbH he was head of hospital IT for the internationally operating Austrian hospital provider. He acquired profound knowledge of health administration in the Austrian ministry of health where he was already working on ELGA.
