Lievens, Yolande
European CanCer Organisation (ECCO)

Graduated in Medicine, Radiation Oncology and Hospital and Health Care Management at the Catholic University in Leuven, Belgium, and obtained a PhD in cost accounting and economic evaluation of radiotherapy.

She is chair of the radiation oncology department of the Ghent University Hospital in Ghent, Belgium, and associate professor at the Ghent University. Her main clinical focus is thoracic oncology.
Apart from the clinics, she has always been closely involved in the organizational aspects of radiotherapy, in the position of radiotherapy within multidisciplinary oncology and in the financial and health economic aspects of cancer care, in Europe and worldwide.

Finally, she is interested in quality issues related to radiation oncology, not only in terms of quality assurance but also regarding the impact of radiation treatments on quality of life.

She is the immediate past-president of ESTRO and of the Belgian College for Physicians in Radiation Oncology. She is (co-)steering the Health Economics in Radiation Oncology (ESTRO- HERO), the Global Impact of Radiotherapy in Oncology (ESTRO-GIRO) and the E2-RADIATE (EORTC-ESTRO Infrastructure for Radiotherapy in Europe) projects.
