Miklós, Zsuzsanna
National Korányi Institute for Pulmonology

Dr. Zsuzsanna Miklós, MD, PhD is Head of the Department of Translational Medicine at the National Korányi Institute for Pulmonology in Budapest, Hungary. She earned her medical degree and PhD at Semmelweis University, Budapest, where she conducted cardiovascular research, led the Heart Physiology research group at the Department of Clinical Research and Human Physiology, and held senior academic positions. She later completed the Global Clinical Scholars Research Training Program at Harvard Medical School, which expanded her focus from basic cardiovascular studies to translational and clinical research. Her current scientific interests include respiratory diseases, cardiovascular comorbidities, and the methodology and implementation of lung cancer screening. She has authored numerous scientific publications and book chapters, and has extensive experience mentoring early-career researchers. She is actively involved in several EU4Health projects, including **SOLACE** and **EUCanScreen**, and is a core member of the scientific coordination team of **JARED**.
