Palmer, Shaun
PhD candidate, Vrije Universiteit Amsterdam

Shaun Palmer is a Senior Communications and Advocacy Specialist at IAVI with almost a decade of experience at the intersection of advocacy, communications, and policy research. Shaun helps lead IAVI's advocacy on HIV and tuberculosis (TB) vaccine development and supports broader European-level advocacy. Since 2021, they have led the TB Vaccine Advocacy Roadmap (TB Vax ARM) coalition, with focus on global advocacy and policy analysis on future access and financing for TB vaccine development. Shaun sits on the core group of the Stop TB Partnership Working Group on New Vaccines representing Developed Country NGOs and leads communications, advocacy, and community engagement for the Global Forum on TB Vaccines. They are currently a Task Force member of Young Forum Gastein.

Shaun holds a BA in Biological Sciences from the University of Cambridge and an MSc in Global Health Research from the Vrije Universiteit Amsterdam. Shaun is currently a PhD candidate at Vrije Universiteit, researching novel access models and related decision-making and governance structures for the development of health innovations for underserved markets.
