

Rizvan, Irina

Institute for Population and Development, Federation of Bosnia and Herzegovina, Bosnia and Herzegovina

Mental health expert with academic and practical experience in project management and human resources with 17 years of successful work experience in the non-governmental sector and state institutions in a leadership position. Participated in many international projects, creation and implementation of a large number of state policies and strategies, where I gained a deep and clear understanding of the mental health reform process in Bosnia and Herzegovina. I also gained experience in cross-sectoral cooperation between governmental and non-governmental institutions, as well as cooperation between institutions within the state sector (social, health and education sectors). I especially emphasize the teaching experience as a high-profile educator, which I gained through long-term participation in education and supervision (going through the processes of planning, organization and realization of educations, seminars, conferences) at the domestic and international level of experts in the field of mental health protection of vulnerable populations.
