

Schiel, Anja

Norwegian Medicines Agency (NoMA)

Anja Schiel has studied Biology at the Johannes Gutenberg-University, Mainz, Germany. She received her PhD from the Free University in Amsterdam in 2006 and worked several years as Post-Doc on a range of subjects focusing on oncology, immunology and molecular biology, first at the University of Leiden and later at the University of Oslo, before starting at the Norwegian Medicines Agency (NoMA) in 2013. At NoMA she is working as Special Adviser/Statistician/Methodologist both on regulatory (EMA) and HTA projects. She has recently been elected Chair of the Scientific Advice Working Party and has been Chair of the Biostatistics Working Party since 2017. In addition, she has been heavily involved in the EMA-EUnetHTA parallel consultations which explains her particular interest in use of statistics in pharmaco-economic evaluations.
