

Shabani, Mahsa

Ghent University

Mahsa Shabani is an Assistant Professor in Privacy Law at IRCP. She is also a member of the Metamedica (Interfaculty platform for ethics and law of healthcare technologies) and PIXLES (Privacy, Information Exchange, Law Enforcement & Surveillance). Her research focus is on personal data protection, health privacy, data sharing and access platforms, and biomedical and genomics research ethics, law and policy. She has extensively published her work in scientific journals with a broad readership in the fields of data protection, medical law, bioethics, genomics and bioinformatics. Between years 2012-2019, she was affiliated with the Center for Biomedical Ethics and Law at KU Leuven as a doctoral researcher and a FWO post-doctoral fellow. Previously, she was a visiting scholar at the Center of Genomics and Policy at McGill University, the Center for Health, Law and Emerging Technologies (HeLEX) at University of Oxford, and the Columbia CEER at Columbia University Medical Center. In the recent years, she has been collaborating with various international and European projects such as the Regulatory and Ethics Working Group of Global Alliance for Genomics and Health initiative, EUCeLEX and euCanSHare projects. Currently, she is a member of the Ethics advisory board of various European Commission (EC) and IMI funded projects (Konfido, RHAPSODY, BEAT-DKD, and HEADSpAcE projects) and acts as an external expert for the EC. She is also a selected member of the Scientific Committee of the International Rare Diseases Research Consortium. She supervises master and doctoral students in the framework of interdisciplinary research projects and contributes to teaching, training and dissemination activities on various aspects of data protection and health privacy on the international and European level.
