Mäklin, Suvi
Finnish Ministry of Social Affairs and Health

Suvi Mäklin is a Senior Specialist at the Finnish Ministry of Social Affairs and Health, where her work focuses on the economic evaluation of legislative proposals and issues related to the financing of health and social care services. She is actively involved in advancing Health System Performance Assessment (HSPA) in Finland and developing approaches for evaluating the performance of the health and social care system. She also serves as Finland's delegate to the EU Expert Group on Health Systems Performance Assessment. She holds degrees in health economics and public health.

Before joining the Ministry in 2024, Suvi worked for more than ten years as a researcher, conducting health technology assessments, producing evidence on healthcare utilization, and analyzing healthcare financing. She also gained experience in the pharmaceutical industry, focusing on HTA, market access, and reimbursement policies. Her experience across research, advocacy, and government has strengthened her interest in promoting evidence-informed policymaking and the effective use of performance information in health system governance and funding decisions.
