

Weiland, Sigrid

European Commission Directorate-General for Health and Food Safety

Dr Sigrid Weiland is working in the Policy Strategy Unit of DG Health and Food Safety (DG SANTE).

Having graduated in biology in Bonn, Germany, she holds a PhD for her work on genetic causes of human hereditary epilepsies.

Before joining the European Commission, she was business-developer in a biotech start-up company and was patent examiner in the area of biotechnology at the European Patent Office in Munich. Since 2005, she has worked on different life sciences and health-related subjects in several services of the European Commission, including the Joint Research Centre, DG Agriculture and DG Research and Innovation, most recently as Secretary of the European Commission's Group of Chief Scientific Advisors (GCSA) and as Assistant to the Special Advisor on COVID-19 to the President of the European Commission. As Secretary of the GCSA she contributed to several scientific opinions, including on 'New Techniques in Agricultural Biotechnology', 'Adaptation to Health Effects of Climate Change in Europe' and 'Towards a Sustainable Food System'.

In 2021 she joined DG SANTE and is following various health- and food-related files, including several ones for which the One Health approach is particularly relevant, such as antimicrobial resistance, climate change induced health impacts and non-communicable diseases.
