GLOBAL AIDS UPDATE 2018

UNAIDS
Number of AIDS-related deaths, number of new HIV infections and incidence:prevalence ratio, global, 2000–2017 and 2020 targets

Source: UNAIDS 2018 estimates.
Aiming for the 2020 treatment target

Number of people living with HIV accessing antiretroviral therapy, global, 2000–2017 and 2020 target

Number of people living with HIV on antiretroviral therapy

Global 90-90-90 Gaps, 2017

HIV testing and treatment cascade, global, 2017

- **Gap to reaching the first 90**: 5.7 million
  - People living with HIV who know their status: 75% [55–92%]

- **Gap to reaching the first and second 90s**: 8.2 million
  - People living with HIV on treatment: 59% [44–73%]

- **Gap to reaching the three 90s**: 9.4 million
  - People living with HIV who are virally suppressed: 47% [35–59%]

New HIV Infections Still Affecting Key Populations

Distribution of new HIV infections
European Union, 2017

- Men who have sex with men: 59%
- Clients of sex workers and sex partners of other key populations: 26%
- People who inject drugs: 7%
- Sex workers: 5%
- Rest of population/unreported risk: 3%

UNAIDS Special Analysis
Key populations at higher risk of infection

Relative risk of HIV acquisition, by population group compared to the general population, global, 2017

- Female sex workers: 13 times higher
- People who inject drugs: 22 times higher
- Gay men and other men who have sex with men: 28 times higher
- Transgender women: 13 times higher

Tuberculosis treatment for people living with HIV still low

Percentage of people living with HIV with incident tuberculosis who received treatment for both tuberculosis and HIV, global, 2000–2016

Global treatment gap for hepatitis C

Cascade of care for people living with hepatitis C virus infection, by WHO region, 2016

2030 target:
- 90% of infected are diagnosed

2030 target:
- 80% of diagnosed are treated

Financial resources not adequate to close the gaps

HIV resource availability in low- and middle-income countries (in constant 2016 US dollars), by source of funding, 2000–2017 and 2020 target

* Estimates for low- and middle-income countries per 2015 World Bank income level classification. All figures are expressed in constant 2016 US dollars.
