EUROPEAN  
HEALTH FORUM  
GASTEIN

## About us

Over the past decade, the European Health Forum Gastein has established itself as an indispensable institution in the scope of European health policy. It provides a platform for discussion and space for networking for the various stakeholders from public & private sector, science and academia & civil society.

By ensuring the coverage of all major and topical debates in health, it has made a decisive contribution to the cross-border exchange of experience, information and cooperation and the development of guidelines. Over 500 leading experts participate in the annual conference held in the Gastein Valley in the Austrian Alps for three days in October.

*Like no other event in Europe, the EHFG is a unique place to discuss health policy. The rich mix of different stakeholders and the high quality of the participants provide a great opportunity to discuss health system policy and research and how they improve health outcomes for EU patients.*

*It has been a tremendous learning experience to actively participate in the Forum and the discussions that are only possible there.*
